Cloud Smarter, Not Harder

Ready to Fast-Track Your Co-selling With AWS and Boost Revenue Potential? Start Your Free Review!

Propel the Success of Your SaaS Product with an FTR from Cloudelligent

Establish a solid foundation of trust with your customers by leveraging our Foundational Technical Review (FTR) Services to ensure that your software adheres to the AWS Well-Architected Framework.

Evaluate the security, reliability, and operational excellence of your application's technical architecture with Cloudelligent's team of experts who are well-versed in the latest industry standards.

Drive business growth when we help you adopt AWS best practices to strengthen security, enhance performance, and seamlessly scale your SaaS solutions.

What is an AWS Foundational Technical Review?

Evaluation of SaaS solution's technical architecture and its alignment with best practices.

Generates recommendations to optimize performance and functionality.

Helps identify and mitigate technical risks for AWS ISV Partners.

Focuses on a subset of the AWS Well-Architected Framework (i.e. security, reliability, and operational excellence).

Transform your SaaS offering with an FTR and a 30-day trial of CoreStack Cloud Governance platform - on us!

FREE Foundational Technical Review

Collaborate with our cloud dream team, consisting of a Cloudelligent Technical Account Manager, AWS-Certified Solutions Architect, and Project Manager. Get a thorough evaluation in just 2-3 hours.

FREE 30-day Trial of CoreStack

Assess and enhance your workloads with CoreStack, an AI-powered multi-cloud governance solution. Ensure your applications meet AWS Well-Architected Framework standards for security, reliability, and operational excellence.

FTR Mini-Workshop

Discover how CoreStack can help you elevate the performance, security, and scalability of your software solutions on AWS. Let us show you how in a team session!

Leverage CoreStack to Speed Up Your FTR Process

- Perform an in-depth evaluation of your application's technical architecture based on the AWS Well-Architected Framework.
- Utilize automation to identify any deviations from industry best practices.
- Instantly receive actionable insights for improving performance, reliability, and scalability.
- Rapidly detect critical issues and obtain automated recommendations for strengthening security.
- Continuously optimize your software products to exceed customer expectations and drive business growth.

Benefits of Performing an AWS Foundational Technical Review

Accelerate your co-selling journey with AWS, expanding your market reach and revenue potential.

Get a Validated and Differentiated Partner status from AWS.

Gain a competitive edge by ensuring that your SaaS solutions meet AWS standards.

Access select AWS Partner programs such as Competency, Service Ready, and ISV Accelerate.

Enhance customer satisfaction by delivering secure, reliable, and scalable applications.

Fuel business growth by unlocking various AWS funding benefits.

Stand out from the crowd with a 'Reviewed by AWS' solutions badge.

Receive dedicated support for Well-Architected and Foundational Technical Review Lenses.

Easy and Secure Setup

Onboard your AWS accounts quickly and securely using our templates with read-only and time-limited access.

Quick Results

Obtain results of your Foundational Technical Review of each workload in 30 minutes.

How Your Review Is Conducted?

Gather Information

- Clearly define the scope of the FTR, including the software modules or components to be reviewed, the review criteria, and the expected outcomes.
- Assemble a team who are knowledgeable about your software development process and the project requirements.

Review

- Conduct a Q&A session between your team and Cloudeelligent.
- Deploy CoreStack to accelerate your Foundational Technical Review.
- Perform a deep dive on your target workload(s) and SaaS products.
- Audit operations focusing on a subset of the AWS Well-Architected Framework (i.e. security, reliability, and operational excellence).

Report

Generate a report that provides:

- Findings of the review highlighting any risks or issues along with recommendations for improvement.
- A list of action items that outlines the steps needed to address the identified risks or issues.

Remediate

- Cloudeelligent helps you address the identified issues to facilitate your business growth. (Actual remediation work performed by Cloudeelligent may have associated costs.)
- We help you submit the final FTR report to AWS and apply for AWS FTR ISV credit funding.
- Our team also provides you with all of the necessary evidence to pass an expedited Foundational Technical Review and earn your badge!
