

AWS Serverless Architectures

Build Powerful and Globally Accessible Applications While Offloading Server Management to AWS

- Offload provisioning, scaling, or managing servers to AWS
- Empower teams to focus on innovation and development
- Get your applications to market faster

Build Future-Proof Applications With AWS Serverless Solutions

- Public Sector
- Immersion Day
- Amazon RDS Delivery
- AWS Lambda Delivery
- AWS Control Tower Delivery

- Amazon API Gateway Delivery
- Well-Architected Partner Program
- Amazon EC2 for Windows Server Delivery

Pay only for the compute time, functions, and resources you use.

Lower costs by eliminating the need to purchase and manage servers.

Automatically scale your workloads and applications on demand.

Jumpstart your Modernization Journey With Cloudelligent

Experience the freedom of effortlessly developing and running applications with our AWS Serverless Solutions. Eliminate the hassle of server installation and management by taking advantage of our experience in real-world engagements.

Let our expert team transform your server-dependent operations into high-performing serverless architectures. Don't let infrastructure management hold you back - go serverless with Cloudelligent!

Our AWS Serverless Solutions

Compute Power

- Leave provisioning and server management to AWS when you run any code with **AWS Lambda**.
- Leverage **AWS Fargate** for containerized applications.
- Process files or data changes in real-time.
- Pay only for the compute time utilized and reduce your costs.

Ready to Go Serverless and Transform Your Business? Scale Your Success!

Cloud Smarter, Not Harder

API Development and Integration

- Develop, deploy, and manage RESTful and WebSocket APIs with ease.
- Build event-driven applications and orchestrate serverless workflows.
- Integrate APIs with existing systems and third-party services using **Amazon API Gateway**.

Developer Tools

- Accelerate development with **AWS CodePipeline** for continuous integration and delivery.
- Leverage **AWS CodeBuild** for automated build and test processes.
- Debug applications with **AWS X-Ray's** tracing and analysis.
- Utilize **AWS CodeCommit** for version control and collaborative coding.

Database Management

- Leverage flexible and low-latency database services at scale such as **Amazon Aurora** and **Amazon DynamoDB**.
- Integrate apps with databases for data transfer and storage.
- Automate when your databases run, shut down, and scale.

Data Streaming and Analytics

- Easily load, stream, and analyze data from various sources.
- Process data in real-time with **AWS Lambda** functions.
- Train machine learning models and run advanced analytics.
- Analyze data with **Amazon Kinesis** and **Amazon QuickSight**.
- Build custom applications that directly access data from AWS storage services.

Data Storage

- Store data securely on serverless resources such as **Amazon S3**.
- Leverage serverless databases and data lakes for flexible scaling.
- Backup and protect data with automated solutions.
- Archive data for cost-effective long-term retention with **Amazon S3 Glacier**.
- Replicate data across regions for high availability and disaster recovery.

Fuel Your Success with Our AWS Serverless Expertise

Accelerate Time-to-Market

Speed up your release cycles with serverless resources and enhance iterative speed.

Enhance App Performance

Integrate your apps with serverless functions for massively parallel execution and lightning-fast performance.

Enjoy High Availability

Benefit from AWS's built-in fault tolerance and high availability that ensures zero downtime.
