- Amazon EC2 for Windows Server Delivery

Uncover **15-50%** increase in AWS cost savings, instantly.

Get a **FREE** annual Cost Optimization Assessment by our Customer Success team.

Stay in **control**. Continuously monitor your AWS infrastructure for changes that affect costs.

5 Key Questions to Consider About AWS Costs

Are you struggling to identify cost savings in the current economic climate?

Do you know your top 5 AWS services that drive high costs?

Are you over-engineering your resources or provisioning them inefficiently?

Do you have processes to eliminate waste such as zombie instances or underutilized resources?

Are you monitoring changes to manage your AWS resources and costs across accounts, regions, departments, and projects?

Cloud Smarter, Not Harder

Unlock savings with a Cost Optimization Assessment and a 30-day trial of CoreStack Cloud Management Platform - on us!

Get a Cost Optimization Assessment - Absolutely FREE!

Work with the FinOps dream team. That's your Cloudelligent Technical Account Manager, along with an AWS-certified Solutions Architect and a Project Manager. Get a comprehensive evaluation in just 1-2 hours.

Enjoy a FREE 30-day trial of CoreStack!

Transform your resource and cost optimization with CoreStack - the ultimate SaaS platform designed for AWS. Streamline governance and provisioning with lightning-fast DevOps speed. No compromises, just results.

Cloudelligent Cost Optimization Mini-Workshop!

Discover how CoreStack elevates AWS cost optimization by continuously monitoring infrastructure changes on AWS. Let us show you how in a team session!

Why Choose Cloudelligent to Optimize Your AWS Costs?

Because We're Experts at Cost Optimization and Cloud Management!

Optimize your AWS costs while building the security, reliability, performance efficiency, and operational excellence that your business requires. Cloudelligent is your go-to AWS Advanced Consulting and Well-Architected Partner, backed by a track record of successful customer engagements.

Let us help you maximize your AWS savings and fuel your business growth. With expertise in AWS DevOps, Data & Analytics, Cloud Migration, and SaaS, we have the know-how to take your business to the next level.

How Our Cost Optimization Assessment Can Revolutionize Your Business?

Take Advantage of Our Free Annual Cost Optimization Assessment!
- Identify potential cost savings with our Customer Success team, leveraging CoreStack's powerful auto-discovery technology.
- We also provide an extensive report of findings for your review.

Optimize Resources and Slash Costs with CoreStack - Free 30-Day Trial!

Maximize your AWS cost efficiency with **CoreStack**.

- Instantly identify infrastructure changes that affect costs, identify underutilized resources, and plan smarter with RI and Spot instances.
- Continuously analyze instances, track costs across your AWS accounts, and receive real-time notifications of any billing anomalies.

Qualify for a 2% Discount of Your AWS Bill

Take charge of your cloud usage with a consolidated billing model for your AWS accounts.

- Reduce account sprawl and overspending while enjoying tiered discounts and aggregated support costs.
- Gain full visibility and control of your organization's cloud usage with ease.

Seize Control of Your Costs and Lower Your AWS Bill

Tired of overpaying for AWS services?

- Apply rightsizing strategies, and identify zombie instances, underutilized resources, and unused EBS volumes.
- Utilize Amazon EC2 Spot instances, EC2 Reserved Instances, and AWS Saving Plans to slash your costs by up to 50%.

Demystify Your AWS Bill and Gain Deeper Insights Into Costs

- **Analyze Amazon EC2 Usage:** Identify where EC2 growth is occurring, and what % the EC2 billing is for data transfer between AZs, EBS volumes, and GPUs?
- **Optimize Network Costs:** Understand the % of network egress costs, and improve resource efficiency outside of cloud zones while reducing payloads.
- **Track Net Monthly Cost Growth:** Identify cost drivers such as increasing network bandwidth.

Reduce Waste and Optimize Your Data Usage

Do you really need all that data?

- Extract the most useful data and archive or delete the rest.
- Optimize hot data and identify unused Amazon S3 buckets and CloudWatch log groups.
- Save costs by adjusting database instances based on your actual utilization.
