- Amazon EC2 for Windows Server Delivery

Accelerate your audit readiness with AI-powered automation tools designed for SOC 2 compliance.

Receive a **personalized** report of your current administrative, technical, and physical safeguards.

Engage in a **1-hour** consultation session and receive expert guidance on enhancing SOC 2 readiness.

Simplify Your SOC 2 Compliance Journey

In today's evolving threat landscape, protecting digital information is a priority – and in some cases, mandatory. With our comprehensive assessment, gain the confidence to navigate the complex regulatory landscape and ensure your business is ready to successfully meet SOC 2 requirements.

Let our team of security experts accelerate your compliance readiness by evaluating your control objectives and activities against the Trust Services Criteria (TSC) of security, availability, processing integrity, confidentiality, and privacy. We leverage AI-powered platforms for AWS to automate your entire compliance journey.

How We Conduct Your SOC 2 Readiness Assessment?

STEP 1: Onboard Automation Tool

- Establish the scope of the SOC 2 obligations.
- Clearly define the Trust Services Criteria (TSC) that apply to your business.
- Onboard AI-powered compliance assessment tools to understand your AWS environment.

STEP 2: Review Your Workloads

- Review the blueprints and solution architecture of your AWS workloads against the SOC 2 framework using specialized assessment tools.
- Proactively identify vulnerabilities, anomalous activities, and areas of non-compliance.

STEP 3: SOC 2 Readiness Review Session

- Receive intelligent SOC 2 compliance recommendations including risk mitigation and best practice plans, all within a **1-hour** consultation session.
- Outline and prioritize areas for SOC 2 compliance to ensure comprehensive alignment with regulatory standards.

Key Deliverables

We generate highly accurate and customized reports based on AI-powered tools' review and analysis.
